# HARDY SHADE TREES

## New SUNBURST LOCUST

We are pleased to offer this newest and most spectacular of shade trees. It's so completely different and unusual, you'll want to be first among your friends and neighbors to have **Sunburst Locust**,—so called because the outer tips of the branches (about 8 to 10 inches) have the brightest golden bronze foliage ever seen on any tree. The tree is fast growing and long-lived; more disease resistant than the common Locust, and completely free of thorns. The habit of growth is symmetrical and broadly pyramidal; the brilliant coloring is limited to the tips of each branch, giving it the appearance of being in full bloom throughout the summer. Will succeed in a wide range of soil and climate. Extremely beautiful as a specimen in garden or lawn. **Strong, well-rooted trees, 5 to 6-ft., each \$6.00; 2 for \$11.00.**

## CRIMSON KING MAPLE

(Plant Pat. No. 735) This beautiful new Maple is of the Norway or Hard Maple family and has all of their good characteristics PLUS the new glory of having brilliant red foliage. The bright coloring holds throughout the summer. Makes a striking color display, either as a single lawn specimen or when planted with other trees. Very hardy and rapid growing; reach a height of 50 feet at maturity. **5 to 6-ft. trees, each \$5.00; 2 for \$9.00.**

## MOUNTAIN ASH

One of the most ornamental of shade trees. Has finely cut, bright green foliage which turns a brilliant orange-red in the fall. Clusters of flashy, bright orange berries enliven the tree in fall and often through winter. ## WHITE FLOWERING DOGWOOD

The Dogwoods are considered our most beautiful native flowering trees. For breathtaking beauty in early spring, White Dogwood with its great profusion of distinctive, lovely white flowers is hard to equal. The finely cut foliage with its deep green of summer, changing to gorgeous reds in the fall, prolongs the beauty of this most attractive, ornamental tree. The spreading branches grow horizontally and slightly upward from the trunk; height at maturity is about 20 feet. A Dogwood makes a beautiful lawn or shrub border specimen. **Heavy rooted, 2 to 3-ft., trees, each \$1.65; 2 for \$2.75.**

## PINK FLOWERING DOGWOOD

The true budded Cornus Florida Rubra. Showy rosy-pink flowers in spring and deep red foliage in the fall distinguish this variety from the White Dogwood; otherwise it is similar in habit of growth and ultimate height. A combination of the two makes a beautiful grouping. **Heavy rooted, 2-ft., trees, each \$3.00; 2 for \$5.00.**

## PIN OAK

A noble and attractive shade tree. Fastest growing of all the Oaks. The foliage is rich green, deeply cut, and colors to a coppery red in fall. Tree grows to a height of 40 to 50 feet at maturity in a symmetrical, pyramidal form. A sturdy, long-lived, rugged grower. Hardy. Adaptable to all locations. **Heavy rooted, 5 to 6-ft. trees, each \$5.00; 2 for \$8.75.**
